PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience designing and optimizing scalable data pipelines and cloud infrastructure. Expert in Apache Kafka for real-time streaming, SQL database management, and Python-based ETL processes. Strong background in cloud platforms (AWS, Oracle Cloud), containerized data workflows with OpenShift/Kubernetes, and data observability using Grafana. Oracle and AWS certified with proven ability to deliver reliable data solutions supporting analytics and business intelligence.

TECHNICAL SKILLS

- **Programming & Scripting:** Python (Pandas, NumPy, PySpark), SQL, YAML
- **Databases:** SQL
- **Cloud Platforms:** AWS (S3, RDS, Redshift, Lambda, Glue, EMR), Oracle Cloud Infrastructure, Azure basics
- **Container & Orchestration:** OpenShift, Kubernetes, Docker, containerized data pipelines
- **Data Visualization & Monitoring:** Grafana, Power BI, Prometheus, Kibana, Open Search.
- **Workflow Orchestration:** Jenkins, scheduled jobs.
- **Version Control & Collaboration:** Git, GitHub, GitLab, JIRA, Confluence, Agile methodologies
- **DevOps Tools:** Ansible, Terraform, CI/CD pipelines, infrastructure automation

PROFESSIONAL EXPERIENCE

Data Engineer

November 2022 – Present

LTIMindtree

Warsaw, Poland

- Design and implement Apache Kafka streaming pipelines processing 500K+ messages daily, ensuring data integrity and optimizing throughput for real-time analytics
- Develop Python-based ETL workflows for data ingestion, transformation, and loading across multiple data sources, reducing data processing time by 40%
- Build and maintain scalable data infrastructure on OpenShift and AWS, supporting data science and analytics teams with reliable data delivery
- Optimize SQL queries and database performance across MySQL, PostgreSQL, and Oracle databases, improving query execution time by 50%
- Create Grafana dashboards for data pipeline monitoring, implementing custom metrics and alerts for data quality, latency, and system health
- Implement data validation frameworks and automated data quality checks, reducing data anomalies by 35%
- Collaborate with data scientists and analysts to understand requirements and design efficient data models supporting ML and BI applications
- Manage data storage solutions on AWS S3 and cloud databases, implementing data lifecycle policies and cost optimization strategies
- Automate database backup, recovery, and maintenance procedures using Python scripts and scheduled jobs
- Deploy containerized data processing applications on Kubernetes, ensuring high availability and horizontal scalability
- Document data architectures, pipeline specifications, and operational procedures for knowledge sharing and team onboarding
- Participate in code reviews and implement best practices for data engineering, including version control, testing, and deployment automation

Graduate Engineering Trainee

October 2022 – December 2022

LTIMindtree

Mumbai, India

- Completed intensive training in data engineering concepts, cloud technologies, and big data frameworks
- Assisted in data pipeline development and database optimization projects under senior data engineer mentorship

EDUCATION

Bachelor of Engineering, Python Specialization

2018 – 2021

Atharva College of Engineering

Mumbai, India

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Architect Associate
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

- AWS Solutions Architect (in progress)
